

FLUID COOLING
SYSTEMS, LLC.

SOLUTIONS

MODULAR MECHANICAL ROOMS

Absorption and Electric Chillers
Boilers and Condensate Systems
Cooling Towers and Structures
Chilled and Condenser Pumping
Heat Exchangers and Valving
VSD Drives and Controls
Skidded or Outdoor Enclosures
PLC or DDC Controls

Chilled water system, 5,200 Tons

Four (4) centrifugal water cooled chillers
Three (3) pumps, 2 in operation, 1 stand-by
18" welded pipe, insulated
Duplex basket strainer

Condenser water system

Four (4) cell cooling tower system
Three (3) pumps, 2 in operation, 1 stand-by
24" welded pipe
Spirex Centrifugal Separator. Full flow filtration

Modular mechanical rooms to enclose systems
Motor control center complete with all controls and instrumentation
